

# MUNEEB AHMED KHAN

Ph.D. Candidate | Pervasive Intelligence (Pi) Lab

📍 Sangmyung University, Korea

✉️ Mail | 🌐 Website | 📄 Google Scholar | 📖 ResearchGate | 📞 +821032287461

## EDUCATION

- **Ph.D. in Software (Machine Learning & Computer Vision)** March 2021 – Expected Aug. 2025
  - Sangmyung University, Cheonan, Korea
  - **Dissertation:** Efficient and Interpretable Deep Learning Frameworks for Real-World Applications
  - **Advisor:** Dr. Heemin Park
- **Master of Science in Information Technology** 2019
  - National University of Science and Technology (NUST), Islamabad, Pakistan
  - **Thesis:** Prediction based Target Tracking in Wireless Sensor Network
- **Bachelor of Computer Engineering** 2014
  - COMSATS Institute of Information Technology (CIIT), Lahore, Pakistan

## TECHNICAL SKILLS

- **ML Frameworks:** TensorFlow, PyTorch, Keras, Python, Pandas
- **Computer Vision:** Object detection and classification, Image segmentation, Visual Intelligence Systems
- **CV Libraries:** OpenCV, Keras, scikit-image, Pillow, NumPy
- **Deep Learning:** SSD, YOLOX, YOLO-NAS, Faster R-CNN, Transfer learning, Attention mechanisms
- **Efficient Model Design:** Lightweight Architecture design, Model Optimization and Quantization
- **Explainable AI:** Grad-CAM, LIME, Integrated Gradients
- **Medical Imaging:** MRI analysis, Tumor segmentation, Multi-class classification, Artifact removal
- **Data Science:** Data collection, Data Cleaning and Labeling, Feature Engineering and Visualization
- **Research Tools:** Google Cloud Platform (GCP), CUDA, Git, LaTeX, Jupyter Notebook

## SELECTED PUBLICATIONS

TOTAL: 23 PUBLICATIONS

- [1] **MA Khan**, H Park. "HP-ViT: Hierarchical Pathology-Aware Vision Transformer for Multi-Label Thoracic Disease Classification in Chest X-rays" Springer Health Information Science and Systems. **IF: 4.7 (In Revision)**
- [2] **MA Khan**, Y Choi, J Eum, H Park. "Traffic Sign Recognition Under Visual Perturbations: Shadows, Light Patches, and Simulated Obstructions." IEEE/CVF Conference on Computer Vision and Pattern Recognition Workshops (CVPRw), 2025. (**Accepted**)
- [3] **MA Khan**, H Park. "Adaptive Channel Attention and Multi-Path Convolutional Architecture for Brain Tumor Detection Using MRI Images." Springer Multimedia Tools and Applications (2025). **IF: 3.0 [Link]**
- [4] **MA Khan**, H Kim, J Eum, Y Myung, Y Choi, H Park. "M-GAID: A Real-World Dataset for Ghosting Artifact Detection and Removal in Mobile Imaging." IEEE/CVF Winter Conference on Applications of Computer Vision Workshops (WACVw), 2025. [**Link**]
- [5] U Ejaz, **MA Khan**, H Park, H Kim. "FireXplainer: An Interpretable Approach for Detection of Wildfires." Korea Computer Congress (KCC), pp. 1109-1111. 2023. [**Link**] (**Best Paper Award**)

## RESEARCH & INDUSTRIAL EXPERIENCE

- **Objective Quality Metrics for Ghosting Artifacts in Video and HDR Images** June 2023 – May 2024  
*Research Funding:* Google Korea  
*Tools:* PyTorch, OpenCV, scikit-image, NumPy, Pandas
  - Built a dataset of 2,500+ real images and annotated over 37,000 patches for spatial/temporal artifact detection.
  - Designed data pipelines for collection, annotation, and feature extraction from diverse imaging sources.
  - Trained SOTA deep learning models for domain specific tasks (e.g ghosting artifacts, object detection)
  - Developed a test framework simulating multiple camera noise conditions for robust artifact evaluation.
- **Multi-Scale Attention Model for Low-Light Image Enhancement** 2024  
*Tools:* PyTorch, LoL Dataset v1/v2, GCP A100, SSIM, MS-SSIM, LPIPS

- Designed a lightweight model (12M parameters) achieving 0.88 SSIM, 0.93 MS-SSIM, 0.207 LPIPS on LoL datasets using GCP A100.
- Worked on integrating attention Mechanisms and transfer learning.
- Implemented an adaptive enhancement pipeline balancing perceptual quality and computational efficiency.
- Reviewed and implemented AAAI, CVPR, and ICCV research papers to optimize model performance.
- **Traffic Sign Recognition with Advanced Neural Network Techniques** 2022 – 2024  
Tools: TensorFlow, OpenCV, Grad-CAM, LIME, GTSRB, ITSD, PTSD
  - Developed an interpretable CNN (2.6M parameters) achieving 98.4% accuracy and 74.34 ms inference.
  - Streamlined ML model development and deployment with MLflow for tracking and reproducibility.
  - Optimize GPU acceleration and parallel processing to optimize the system performance.
- **Brain Tumor Detection Using Magnetic Resonance Imaging** 2023 – 2024  
Tools: TensorFlow, Keras, Grad-CAM, LIME
  - Developed a lightweight convolutional block architecture achieving 99.51% mAP with 17.2 ms inference speed.
  - Performed tumor segmentation, lesion classification, and anomaly detection in multi-modal MRI sequences.
  - Reduced false positives by 78% using explainable AI techniques (Grad-CAM, LIME).
- **FireXplainNet: Interpretable Wildfire Detection System** 2022 – 2023  
Tools: PyTorch, Grad-CAM, Matplotlib
  - Developed a lightweight interpretable CNN (5.3M parameters) for early wildfire detection.
  - Applied gradient-based attribution (Grad-CAM) for decision explainability in high-risk outdoor scenarios.
  - Achieved high accuracy under variable conditions; received Best Paper Award at KCC 2023.
- **YOLO-Based Real-Time Object Detection and Tracking System** 2021 – 2023  
Tools: YOLOv5, YOLO-NAS, DeepSORT, Kalman Filter, ByteTrack, PyTorch, OpenCV
  - Built a real-time multi-object detection and tracking system using YOLOv5/YOLO-NAS and DeepSORT.
  - Achieved mAP > 92% and 30+ FPS on COCO/MOT datasets, enabling real-time visual intelligence.
  - Leveraged GPU parallelization strategies to optimize inference performance.

## RESEARCH FUNDING & HONORS

---

- **Google Korea Research Grant** (2024-Present): "Post-Processing Methods for Artifact Removal"
- **Google Korea Research Grant** (2023-2024): "Objective Quality Metrics for Ghosting Artifacts"
- **Best Paper Award** (2023): "FireXplainer: An Interpretable Approach for Detection of Wildfires" KCC, Jeju, Korea
- **Professor Scholarship for Ph.D.** (2021-2025): Pi-Lab, Sangmyung University
- **DURE Scholarship** (2022-2023): For international collaboration with Mongolia
- **Teaching Assistant Scholarship** (2021-2022): Department of Software, Sangmyung University

## CONFERENCE PARTICIPATION

---

- WACV'25, CVPR'23, KCC'23, ICWSM'22, KCC'22, WWW'21, AAAI'21, CSCW'21

## CURRENT PROJECTS

---

- **Post-Processing Methods for Artifact Removal Using Machine Learning** @Google Korea & Pi Lab, Korea  
*Research Funding: Google Korea*
  - Investigating machine learning techniques for suppressing noise, ghosting, and compression artifacts.
  - Optimized artifact removal performance across diverse imaging modalities.
  - Designed deployment strategies suitable for mobile and resource-constrained environments.
- **Multi-Modal Framework for Medical Condition Classification and Detection** @ Pi Lab, Korea
  - Developing multi-class detection system for brain tumors, COVID-19, pneumonia, and lung opacities.
  - Working on CNN architectures to handle ambiguous boundaries in medical images.
  - Optimizing model performance for resource-constrained clinical environments with explainability.
- **Partial Diffusion Model Architecture for Medical Image Super-Resolution**
  - Developing partial diffusion techniques for medical image resolution enhancement.
  - Optimizing computational efficiency for deployment with limited resources.
  - Quantifying diagnostic value improvements through clinical partner collaboration.
